in the brand

## More than 20 years, we care about the health of future generations

The main objective of the company - improving the living quality and health of young mothers and their babies. In our own scientific-technical laboratory we create and improve modern cosmetic preparations. Our production is based on high-tech & natural hypoallergenic ingredients

More than 20 years, we create high quality and safe products

We produce a 75 unique composition of natural products with bioactive components, skin friendly and free from harsh chemicals for safe use on delicate skin & eczema.

More than 20 years, we improve the quality of life with our products using natural hypoallergenic ingredients for the production of cosmetics

Our mission is to take care of the health of future generations, we produce cosmetics only from ingredients with the highest level of safety and hypoallergenic. We make maximum use of bioactive components of plant origin.

We create our products with the participation of the best dermatologists and pediatricians, implement a social program aimed at raising public awareness about hygiene and proper care for children, as well as provide assistance in informing health professionals about updates in the market of specialized medical and cosmetic products and their use.

# Baby's cosmetics

## line sensitive skin

As each product line sensitive skin contains special moisturizing BIO-active ingredients, natural oils, herbal extracts and vitamins

In order not to make it bad for a baby, pediatricians recommend that only children's cosmetics that have a confirmation of "hypoallergenic" are used for regular procedures for the care of sensitive skin

When physiologically thinner skin of the child is weakened, has a tendency to severe dryness or signs of irritation, special proper care becomes a priority for parents.
